

Cheyenne, Bailey, Brandon

November 19th Meeting

Design Capstone

Professor Finkbine

11/19/2024

Discord Team Meeting: 8:00- 8:49

- Completed RF-5
- Redid MySQL schema on workbench
- Settled that we have switched to SQLite not doing MySQL anymore
- Uploaded RF-5 to canvas and to GitHub
- Uploaded the new ERR diagram
 - o We left the new and old because they are very similar, just little changes if one becomes corrupt. The old one could be used while the new one is being fixed or someone is obtaining the new one again.

Todo:

- Upgrade the prototype where they hit the location and add in text option with specific on what they see.
- Make sure that it says paddlers remember to be off the water by 8pm throughout the entire app. Make them hit okay on that message and keep it on the screen.
