Cheyenne Pierpont

Week Two Capstone Design Update

Capstone

Professor Finkbine

09/10/2024

Hey just to talk about it and figure before our zoom tonight. If Finkbine asked what we did for the week I was going to reiterate about deciding on the model for the app. Saying we choose a tiered model where certain workers get certain access inside the app for certain situations. Then saying we have our database tables set up. I'm thinking he's not going to ask much because he's more focused on getting groups and projects fully set. Anyone have anything they think we should add?

Meeting went over SQL documents. We designed the tiered model for the app this week. I updated Sherri that the project was for a go.

Plan for an easy way to transfer for software.

For the backup file

```
mysqldump -u [username] -p [database_name] > [backup_file.sql]
```
